

Polycare® Frizz Therapy

Frizz defy

INCI: Polymethacrylamido-propyltrimonium Chloride

Polycare® Frizz Therapy is a synthetic low viscosity cationic polymer. For efficacy reason, this polymer is ideally suited for leave on treatments & styling products. It is supplied under a liquid concentrated form (active: 32-34 %). Readily soluble in water, alcohol, glycol and other common solvents. It delivers flexible hold properties without any negative making it suitable for daily use

- **HIGH HUMIDITY RESISTANCE**
- **Not greasy, not sticky, no flakes**
- **No build up, no cardboard effect**
- **Possible daily use**
- **HEAT PROTECTION**

- Anti-Frizz efficacy +++
@50 & 80% R.H
- Heat protection
